Bill Perdue, President
AAIRRG
P.O. Box 9169
Missoula, MT 59807-9169

Dear Bill,

Aviation Repair Resources' primary business is the repair of composite and sheet metal components (from small panels to flight controls) on regional aircraft. We also have a complete machine shop capable of fabricating parts, tools and equipment and have a degreed engineer on staff. We are currently in negotiation to become authorized vendors for both ATR and Bombardier and should soon receive our EASA certification. Our sister company is the largest after market supplier of Saab 340 parts in the world and the largest supplier of ATR parts in North America.

We have been long time supporters of ARSA, and AAIRRG is another shining example of their commitment to the repair station community. Through AAIRRG we have been able to significantly reduce the cost of our liability insurance while enjoying great customer service. We are very excited by the potential for many more great products that AAIRRG may be instrumental in developing along with ARSA.

If I can be of any service to you or AAIRRG, please do not hesitate to contact me.

Sincerely,

Barry Muhler
Director of Operations
Aviation Repair Resources, Inc.
